

## **VÍS: Total share capital and voting rights**

According to Article 84 of the Icelandic Act on Securities Transactions No 108/2007, an issuer shall, where the issuer increases or reduces its share capital or number of voting rights, on the last trading day of the calendar month in which the changes occur, disclose the total number of shares and the total number of voting rights.

Reference is made to VÍS's announcement, published on 19 July 2018, regarding the reduction in the company's share capital, approved by the company's shareholders meeting on 27 June 2018. After the reduction in share capital, the total nominal value of the company's share capital is ISK 1,952,642,307 divided into the same number of shares. Each ISK 1 in share capital conveys one vote.
